Skier's Responsibility Code

Skiing involves certain elements of risk that personal awareness and common sense can help reduce.

1. Always stay in control, you should be able to stop or avoid other people or objects.
2. People in front of you have the right of way.
3. Do not stop where you block or obstruct a trail, or are not visible from above.
4. When you are starting downhill or merging into a trail, check uphill and yield to others.
5. Always use ski brakes or binding straps to prevent runaway equipment.
6. Observe posted signs and warnings.
7. Prior to using any lift you need to know how to load, ride and unload safely.

This is only a partial list. Always ski in control and be aware that conditions are constantly changing.

Note: The difficulty of slopes and trails varies between ski areas. Before you board any lift or ski any trail at Mount Tone know the degree of difficulty and the current conditions.
