TRAIL ETIQUETTE

Stay on the Trail

Trail work is carefully planned. By going off-trail you are causing an eyesore, damaging ground, biking where you shouldn't, and giving cyclists a bad name. Don't avoid trenches, roots, or wet spots if it means detouring around the trail and don't cut switchbacks.

Ride, Don't Slide!

Lay off the brakes! Skilled riders don't lock up the back brakes. Trenching the trail by skidding quickly wrecks it and causes very difficult maintenance problems. Spend a day doing trail work and you'll understand...

Leave No Trace

This isn't wilderness, but that doesn't mean we want to see your litter or bike parts on the trail. **Pack out what you pack in and keep it clean.**

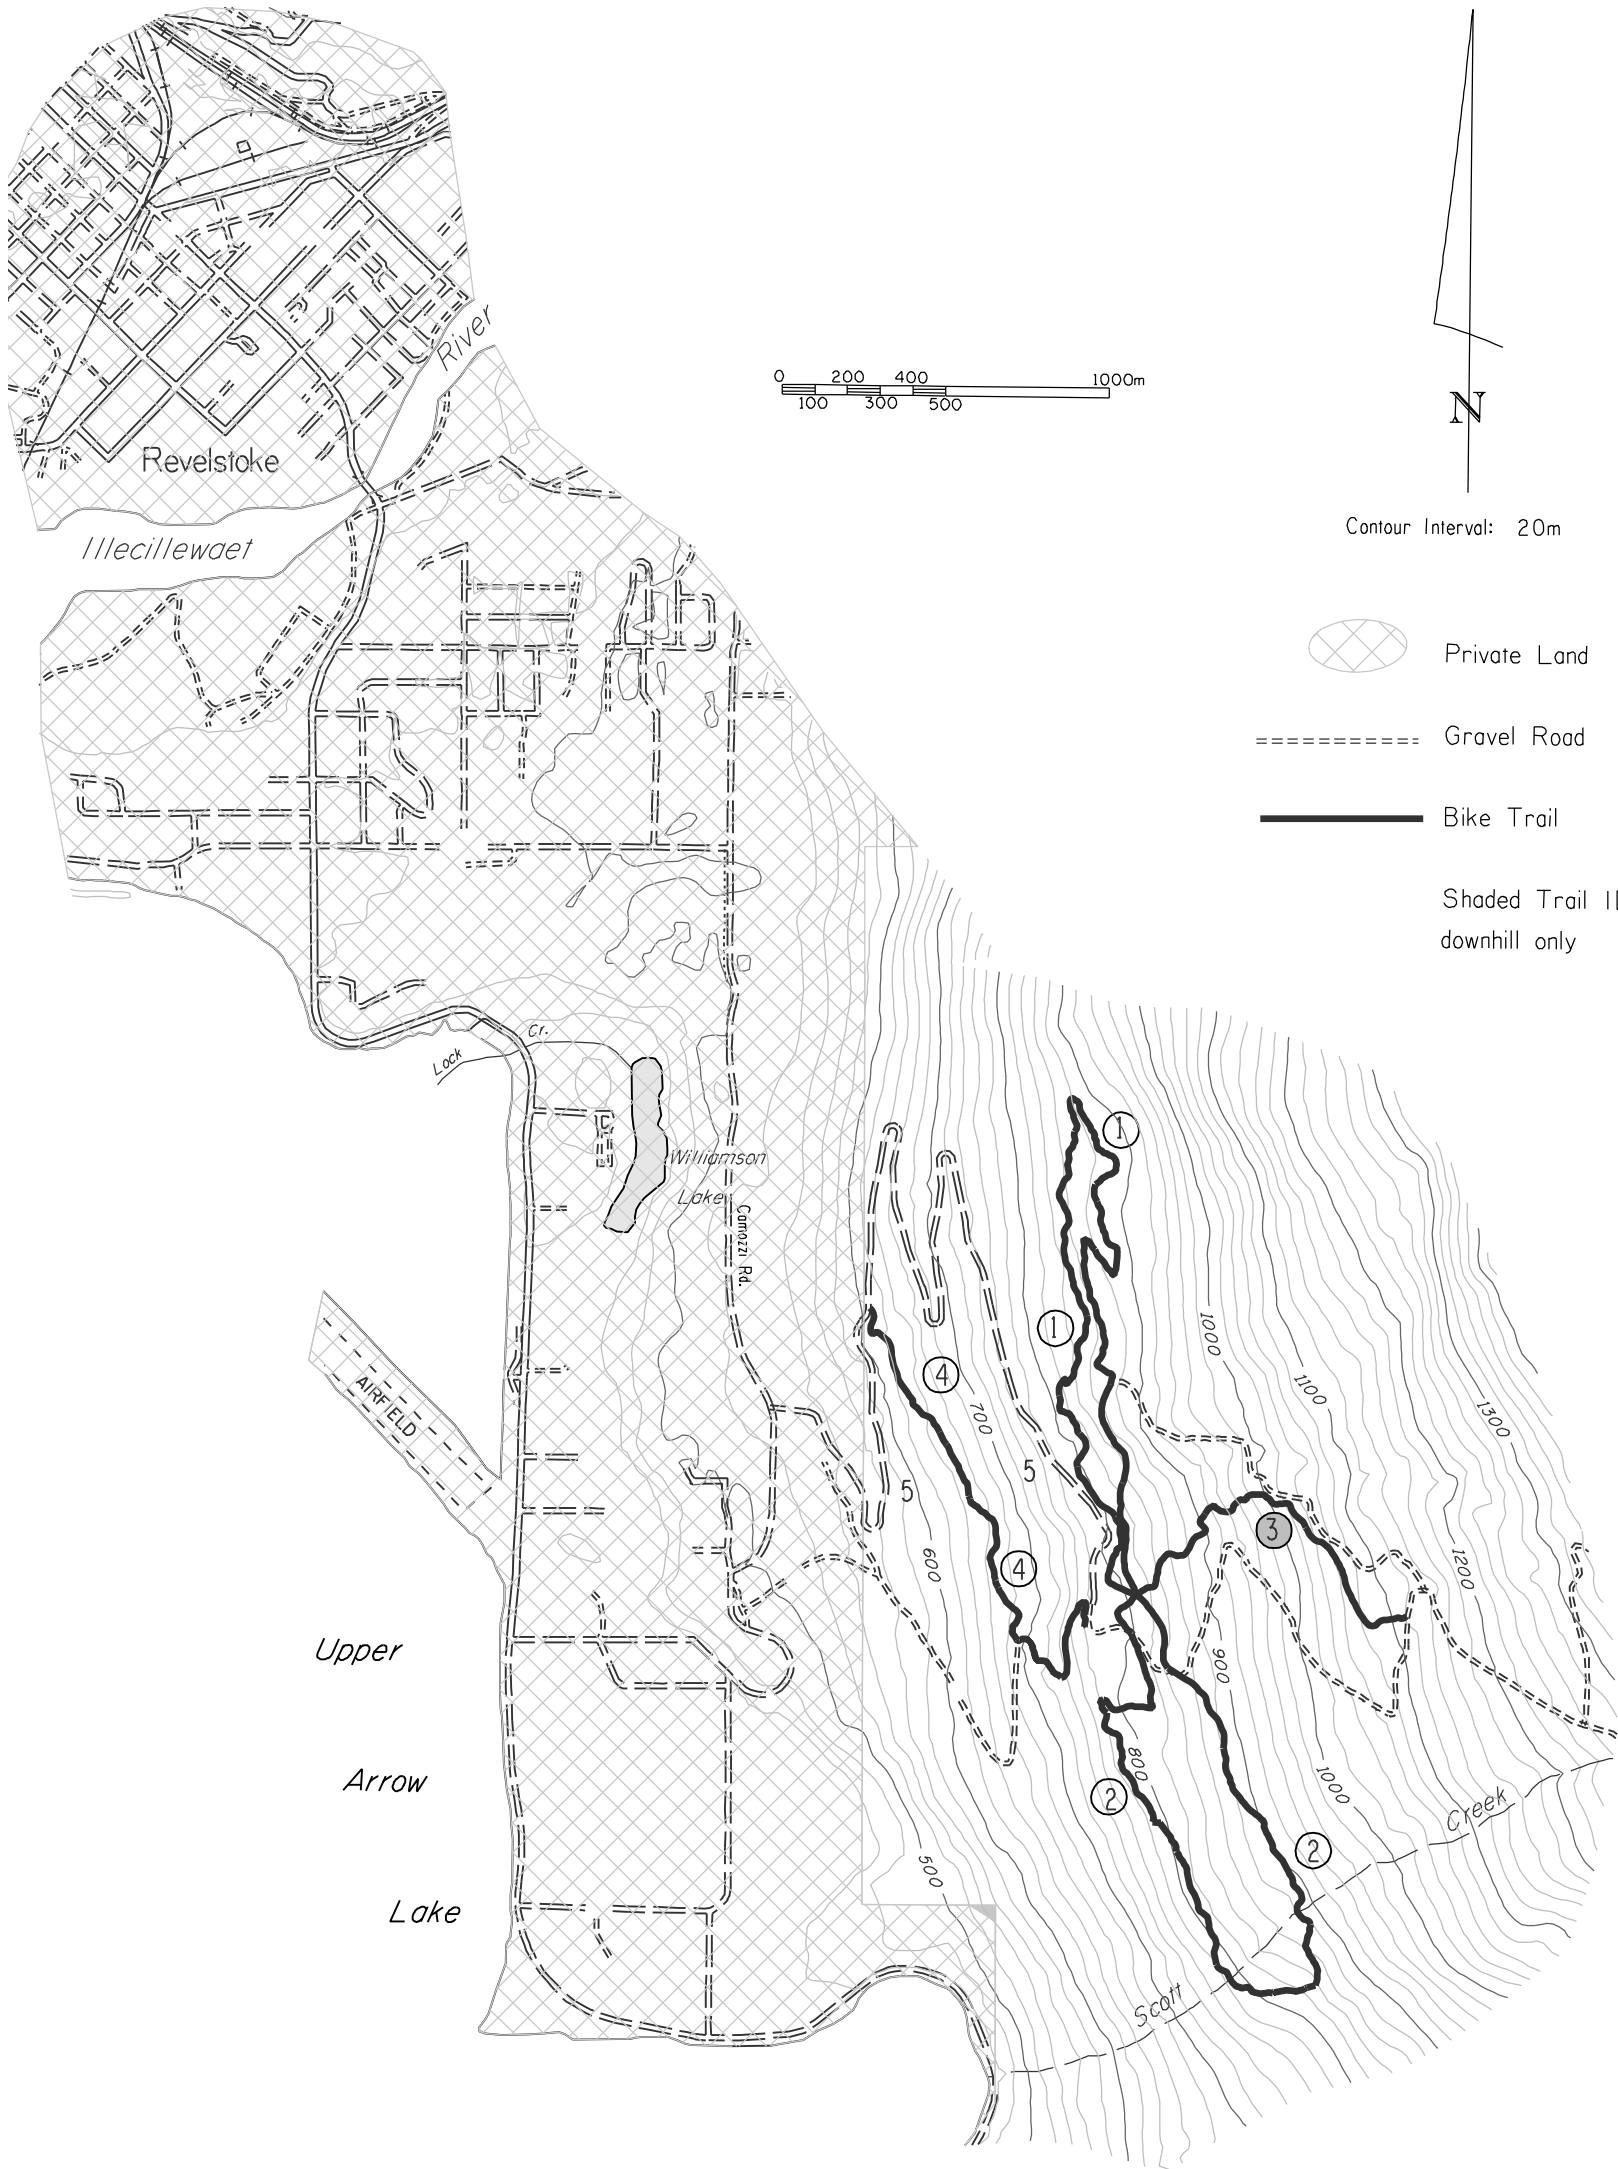

Yield!

Trails aren't just used by you. Yield to the downhill rider. **Mountain bikes ALWAYS yield to hikers.** If you encounter a horse, get off your bike and let it pass.
