

# OUTSIDE LANDS

AUGUST  
14-15  
2010

MUSIC.  
FOOD.  
WINE.  
ART.

**PANHANDLE SOLAR STAGE**  
For the 3rd year in a row the Panhandle Stage will be completely powered by solar energy including all of the sound and lighting. The Panhandle Stage is powered by 2.5 kW of solar, which supplies sunlight to (36) 6-volt batteries. The array powers (4) Outback Systems Inverters pumping 140 amps of power at 120 Volts. The system is engineered to push Lab Gruppen amps powering (10) Sound Bridge double 18" Subs with (8) per side NEXO Line Array Tops. Because we are using solar, we are able to provide a true sign wave of 120 volts. We are utilizing the platform of Outside Lands to demonstrate the direction and alternatives to the way power can be produced for live music events...welcome to the future.

PARDUCCI & PAUL DOLAN • A DONKEY AND GOAT • BEDROCK WINE CO.  
HOBO WINE CO. • BERRYESSA GAP • TALLULAH • FOGGY BRIDGE**

## Eco LANDS

powered by you

Located in Speedway Meadow and powered entirely by solar energy, Eco Lands will once again be the epicenter of the Outside Lands' sustainability mission and environmental commitment. Over the past three years, Outside Lands has continued to implement innovative approaches to ensure the most environmentally sustainable event possible. Every single person attending Outside Lands will participate in decreasing the carbon footprint of the festival by checking out the hottest live acts featured on the solar-powered Panhandle Stage, choosing refillable water bottles over plastic ones, recycling and composting their waste, taking to the festival or picking up local food from our farmers' market and restaurants.

Eco Lands is also providing environmental educational and experiential opportunities to Outside Lands attendees through partnerships with local and national non-profit organizations that reflect diverse approaches to improving and expanding environmental participation. Everyone can lend a helping hand and mind in supporting the greening initiatives of the festival...and we encourage you to be the difference! A special thanks to our green partners, All Star, Merrell, Chico and PG&E.

### REFILLABLE WATER PROGRAM

We are encouraging all concert attendees to choose refillable water over plastic water bottles to cut down on the plastic consumption and overall carbon footprint of the festival. For the second year in a row, we are offering two different refillable water options: either purchase a 2010 OSL stainless steel water bottle at a water station or the merchandise booth and receive free refills of spring water the entire festival or bring your own from home and purchase the refills. If you bring your 2008 or 2009 OSL water bottle bring for free all weekend long! The refillable water stations are located in the Polo Field and Eco Lands. Thanks for supporting our greening initiatives!
