THE GREENWAY

GRAND FORKS / EAST GRAND FORKS

The flood of 1997 dramatically altered the landscape of Grand Forks and East Grand Forks. More than 56,000 people were evacuated before waters of the Red and Red Lake rivers crested. Seventy-five percent of Grand Forks and ninety-five percent of East Grand Forks were inundated with water. The cities made national headlines as eleven of Grand Forks' downtown buildings burned. To ensure that Greater Grand Forks would be protected against future flooding, the US Army Corps of Engineers proposed the construction of a flood protection system including a Greenway, along the Red and Red Lake rivers.

This Greenway provides a unique opportunity for year-round outdoor recreational activities in the Greater Grand Forks area. Encompassing approximately 2,200 acres of open space, vegetation, and recreational amenities, the Greenway is located in both states between the flood protection system and the Red River and Red Lake River in East Grand Forks, MN.

LEGEND

- YOU ARE HERE** (Pink dot)
- Hiking Trail Access (Hiker icon)
